Functions of the BC 1706 HR

Introduction

Congratulations on having chosen a bicycle computer from SIGMA. Your new BC 1706 HR will provide you reliable service in riding your bike for many years to come.

The BC 1706 HR is a state-of-the-art measuring instrument. Please read instructions carefully to become familiar with the functions and usage of this bicycle computer.

SIGMA wishes you an enjoyable time using your BC 1706 HR.

CONNECTION

- Installation of the BC 1706 HR into the mounting bracket. Zero on speed and pulse display is blinking.
- If needed, press MODE 2 until ECG PULSE is displaying.
- There are 2 possibilities to pair speed and heart rate:

1. Riding, after 20 seconds (max. 5 min.) the receiver has matched with both transmitters, data will be displayed.

2. Turn front wheel until KMH/MPH display has stopped blinking (A).

The chest belt transmit some signals (B) ECG PULSE stops to blinking, values are shown.

- After 5 min. of no transmission, BC 1706 HR changes to sleep mode (Time and Model name shown in the display). Press any button to re-activate the Computer a short Pairing will find the transmitter.
- Removing the BC 1706 HR from the mounting will cut off the connection.

- If TOO MANY SIGNALS are shown: Extend the distance of all transmitters and press any button to continue. Pairing starts again.

DISPLAY CHANGE

- Press MODE1 button until the desired function is displayed (TRIP DIST, TRIP TIME, AVG. SPEED, MAX. SPEED).

- Press MODE 2 button until the desired function is displayed (ECG PULSE, AVG. PULSE, MAX. PULSE, CLOCK, STOPWATCH, TIMER, TRIP UP/DOWN, ODO BIKE 1/2*, TOTAL ODO*, TIME BIKE 1/2*, TOTAL TIME*)

* not whilst moving

DISPLAY ILLUMINATION

- The lighting function is switched on/off when you press the SET and RESET button at the same time.

- Display quickly shows LIGHT ON/LIGHT OFF.

- By pressing any button display will be illuminated, with the next pressure you can switch to the next function.

Protect the battery by avoiding unnecessary illumination!

BASIC SETTINGS

- Press SET for 3 sec to make the following basic settings:

- Language, change between kmh/mph, wheel size 1/2, time, show pulse, km-bike 1/2, time-bike 1/2 and display contrast. After changing the battery only the time and display contrast have to be entered.

1. ASSEMBLY 2nd WHEEL

Switching between WHEEL 1 and WHEEL 2 is automatic.

Optional bike 2
Art.-Code:
00405

red

- You have to take the (optional) transmitter bike 2 (red button).
- It is no longer possible to change by making an entry.
- There is only one heart rate transmitter.

↑ SET

2. LANGUAGE ENTRY

- Press MODE1 until LANGUAGE is displayed.
- Press the SET button briefly.

MODE1 ↑

- The display flashes. Set the desired language using the MODE1 button and.

↑ SET

- Confirm by pressing SET.

- SET OK in Display confirm the modification.

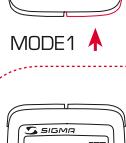

3. KMH / MPH ENTRY

- Press MODE1 to change between KMH/MPH entry.
- Press SET briefly.

↑ SET

- KMH or MPH is displayed and flashes.
- Select MPH or KMH using MODE1.

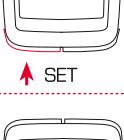

MODE1 ↑

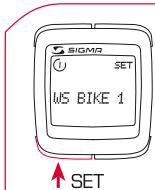

MPH KMH

- Confirm by pressing the SET button.

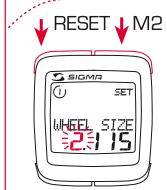

↑ SET

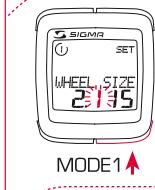

- SET OK in Display confirm the modification.

**4. WHEEL SIZE BIKE 1 ENTRY**

- Press MODE1 to change to BIKE 1.
- Press SET briefly.

- Wheel size is displayed and the first digits blink.
- Select values by pressing MODE2 (+) or RESET (-).

- Press MODE 1 button to change to the next digit, enter the values as shown above.

- Bike 1 is always the bike with the transmitter Bike 1 (grey plate).

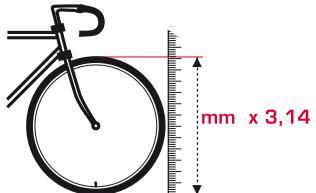

- Determine the correct value for your wheel size from Table C "Wheel Size Chart" (refer to next page). Enter this value.

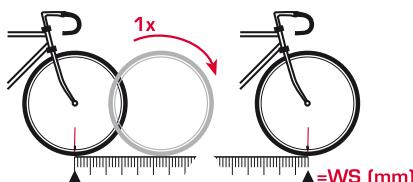

- Enter the value with RESET/MODE 2 button.
- Alternatively: calculate/determine WS (Tab. A or Tab. B).

RESET M2

- After the last digit, confirm by pressing SET.

**WHEEL SIZE CHART****A**

- Bike 2 is always the bike with the speed transmitters labeled bike 2 (optional).

optional Bike 2
Art.-Code:
00405

Bike 1

RESET ↓ M2 ↓

- SET OK in Display confirm the modification.

5. WHEEL SIZE BIKE 2

- Press MODE1 to change to BIKE 2.
- Press SET briefly.

- First digit flashes.
- Entry as for WHEEL 1: Select values by pressing RESET/MODE2, move to the next digit by pressing MODE1 etc.

6. TIME ENTRY

(kmh = 24 h / mph = 12 h)

- Press MODE1 until CLOCK is displayed.
- Press the SET button briefly.

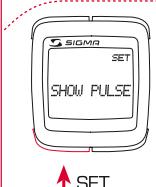

- The entry flashes.
- Set the hours with the RESET/MODE2 button.

- Change to the minute entry by pressing MODE1.
- Set the minutes with the RESET/MODE2 button.

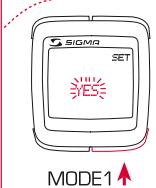

- Confirm by pressing the SET button.

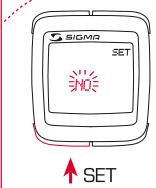

7. HEART RATE DISPLAY

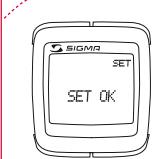

- Press MODE 1 button until SHOW PULSE is displayed.
- Press SET briefly.

- Entry shows the current setting.
- Select YES or NO by pressing MODE1, confirm by pressing SET.
- YES, if you wear the chest belt transmitter.

- Selecting NO, the ECG PULSE, AVG PULSE and MAX PULSE functions will not be displayed and there will be no pairing.
- Confirm by pressing the SET button.

- SET OK in Display confirm the modification.

TOTAL DATA ENTRY

8. KM-BIKE 1/2 9. TIME-BIKE 1/2

- You can transfer the total Km, e.g. when purchasing this device, from another bike computer here.
- Press SET briefly.

- The first digit is flashing.

- Proceed like for the wheel size:
Select value by pressing RESET/MODE2, move to the next digit by pressing MODE1 etc.

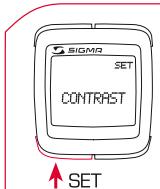

- Press MODE 1 button for moving to the next digit.

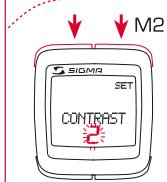

- After entry of the last digit confirm by pressing SET.

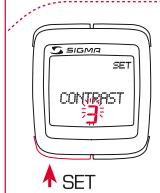

**10. CONTRAST**

- Press MODE1 until CONTRAST is displayed.
- Press SET briefly.

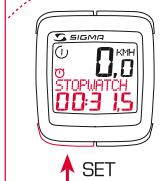

- The entry flashes.
- Set the value by pressing the RESET/MODE2 button (1=weak 3=strong).

- Confirm by pressing the SET button.
- To leave the setting menu please hold the SET-button for 3 seconds.

1.6 SET STOPWATCH

- Press MODE 2 until STOPWATCH is displayed.
- Press SET to start.

- Stop and re-start by pressing the SET button.

- Hold down RESET > 3 sec to reset the display to zero.

**1.7 SET TIMER (+/-)**

- Press MODE 2 until TIMER +/- is displayed.
- Hold down the SET button.

- Display flashes.
- Press MODE1 to count upwards (+) or downwards (-).
- Confirm by pressing the SET button.

- Enter the starting time for TIMER +/- by pressing RESET/MODE2.

- Press MODE1 to jump to the next digit. Confirm by pressing the SET button.

1.8 SET KM COUNTER (+/-)

2.1 COMPARE SPEED

- Press MODE 2 until TRIP UP/DOWN is displayed.
- Hold down the SET button.

- Display flashes.
- Press MODE1 to count upwards (+) or downwards (-).

- Confirm by pressing the SET button.
- Enter the starting time for TIMER +/- by pressing RESET/MODE2.

- Press MODE1 to jump to the next digit.
- Set the value by pressing the RESET/MODE2 button.
- Confirm by pressing the SET button.

2.1 COMPARE SPEED

Speed/Average speed

- If the speed is nearly the same ■ is displayed.

- If lower speed ↓ will be displayed.

- If higher speed ↑ will be displayed.
- It is displayed for all functions except in the basic settings.

2.2 DELETE

RESET DISPLAY

- Press MODE1/2 until the desired function is displayed. Hold down the RESET button.

- Display flashes.

- After 2 sec **only** the displayed function is reset to 0.

↓ > 3,5 sec

- Press RESET for longer than 4 sec to reset the displays for AVG, PULSE, MAX, PULSE, TRIP DIST., TRIP TIME, AVG.SPEED, MAX. SPEED to zero.

3. TECHNICAL DATA

	Default	Max	Min	Units

*Depends on the presettled wheel size

3.1 GENERAL WARNINGS

Battery:

1 lithium button cell 2032, 3V.

In case Computer battery is weak, battery symbol and "LOW" will be displayed.

Computer: 1 x CR 2032, 3V

Speed transmitter: 1 x CR 2032, 3V

Chest belt: 1 x CR 2032, 3V

MEMORY:

The data will be recorded by:

- Quit the setting menu
- Going into sleep mode

3.2 WARRANTY

We are liable to our contracting partners for defects as defined by law. Batteries are excluded from the guarantee.

Batteries can be returned after use.

3.3 TROUBLE SHOOTING

3.4 CHANGE BATTERY

GB

► KMH no display

- Old mounting bracket with radio transfer (RDS) used?
- Computer correctly slotted into mounting bracket?
- Contacts checked for oxidation/corrosion?
- Distance between magnet and sensor (max. 12 mm)
- Checked whether magnet is magnetised?

► No display of heart rate

- In setting SHOW PULSE = NO
- Refer to no display of KMH
- Transmitter chestbelt moistureed, before use?

► No display (screen blank)

- Check battery
- Battery inserted correctly (plus and minus)?
- Battery contact ok? (bend carefully!)

► KMH wrong display

- 2 magnets installed?
- Magnet positioned correctly?
- Wheel size set wrongly?
- Correct handlebar installed after bike changed?

► Display black/changes slowly

- Temperature too high (>60°C) or too low (<0°C)

► No pairing

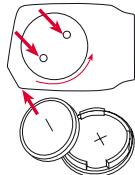

- Check distance between transmitter/magnet
- Transmitter battery discharged
- Activate the Computer by pressing any button
- Check distance between transmitter/receiver
- If using a hub dynamo, change the position of the transmitter

► Too many signals are shown:

- Extend distance between transmitters and press any button

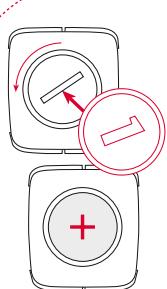

Transmitter:

- Open top cover with tool.
- Take the battery out of the top cover!
- Pay attention to polarity!

Note:

3.4 CHANGE BATTERY

Computer:

- Open the top cover with a coin
- WHEEL SIZE BIKE1/2, TRIP TIME BIKE 1/2 and TOTAL ODO BIKE 1/2, LANGUAGE, KMH/MPH remain saved even when the battery is changed.
- Observe direction of plus and minus poles; when the compartment is open you must see the PLUS side of the battery!
- If sealing ring is loose, re-insert it
- After battery change you have to re-enter clock and contrast again.

Pay attention to the polarity!

Chestbelt:

- Open the top cover with a coin
- Pay attention to the polarity!

3.4 CHANGE BATTERY
